

A little color. Only where you choose.

Choose a preset and existing keys in OpenSCAD Customizer JSON. Edit the color values while keeping vector arity and every unselected byte.

03 Review the exact changes

fileFormatVersion "1"

private-palette.json · Preset: Palette

3 values changed **8** values preserved **1** other presets

Vectors stay JSON strings. The quoted values shown here are the exact storage representation.

Exact encoded values for your selected keys

Key	Before	After	Quantization Δ · RGBA
paint_hex	"#000000"	"#ff0000"	0, 0, 0, 0
paint_rgb	"[0.25, 0.5, 0.75]"	"[0, 1, 0]"	0, 0, 0, 0
paint_rgba	"[0.5, 0.25, 0.75, 0.25]"	"[0, 0, 1, 0.5]"	0, 0, 0, 0

A copy with other bytes intact

Every byte outside the selected value-string tokens is preserved. Download a copy and keep the original safe.

OpenSCAD normally finds a JSON file beside the model with the same basename. Place/name the copy for its matching model.
